FBT code: 13720079R

APPLICATION

This Line Output Power Transformer series has been developed to provide the required scanning amplitude and EHT for the full range of 110° CTV's and wide screen Colour Picture Tubes operating at line frequencies of 15625 (Standard) or 31250 Hz (HDTV) and is suitable for very high quality CTV's, home theatre consumer electronics products and multimedia applications.

The five diodes version is specially designed for HDTV and 16:9 applications. The external connections are made via 12 pins which are directly solderable to the PCB.

The focus potentiometer is internally connected to ground.

It is designed in order to meet International Safety Standards.
